Cory Franklin MD : Cook County ICU: 30 Years of Unforgettable Patients and Odd Cases before purchasing it in order to gage whether or not it would be worth my time, and all praised Cook County ICU: 30 Years of Unforgettable Patients and Odd Cases:

about medicine but now doesn't. There was no drama or Medical mysteries to solve or report about, just musings of a retired doctor. Even the HIV epidemic, with its fears and heroics at the height of the disease was dealt with as a few interesting cases. I kept hoping that the book would get better, but it didn't. 0 of 0 people found the following review helpful. Fairly interesting

This was an easy read about a Dr whom worked at Cook County. I was entertained until about the last chapter. I don't know if that was me, or the book. The stories about the patients was the most interesting parts of the book. 0 of 0 people found the following review helpful. Great!

Wonderful medical story teller. The book is hard to put down. It helps that the author is a doctor who has experienced these things himself.

An inside look at one of the nation's most famous public hospitals, Cook County, as seen through the eyes of its longtime Director of Intensive Care, Dr. Cory Franklin. Readers will be riveted by stories of strange medical cases and unforgettable patients culled from his 30-year career in medicine that spanned the 1970s through the 1990s, including some major moments in medical history like the AIDS epidemic and the deadly Chicago heatwave of 1995. We follow Dr. Franklin as he unravels a host of strange cases including the nurse with rare Munchausen syndrome, the only surviving ricin victim, and the professor with Alzheimer's hiding the effects of the wrong medication. Each chapter features stories centered on a medical topic like body temperature, medications, detecting poisons, and the art of "taking a history" Readers will come away learning how the practice of medicine has changed over the years, which will be insightful for patients, doctors, and medical students alike. Dr. Cory Franklin was an M.D. for more than 30 years and Director of Intensive Care at Cook County Hospital in Chicago for 25 years. In 1993, he worked as a technical advisor to Harrison Ford and was one of the role models for the physician Ford played in the film *The Fugitive*. Dr. Franklin is an editorial board contributor to the *Chicago Tribune* and the author of *Chicago Flashbulbs*. He has written for the *New York Times*, *Washington Post*, and the *Chicago Sun-Times*. He lives in Wilmette, Illinois.

“Longtime doctor and first-rate observer Cory Franklin writes that, in the emergency room, ‘the day shift was rap music, the evening shift was easy listening, and the overnight shift was jazz.’ Franklin is an overnigher, riffing on practitioners and patients, jamming with equal parts pride and regret about his fascinating and sometimes brutal world.” —Marilyn Johnson, author of *Lives in Ruins: Archaeologists and the Seductive Lure of Human Rubble*
