R.F. Very thorough, balanced viewpoints, useful chapter sections (especially the exercises at the end of each chapter), and empirically supported throughout. Also really like that each chapter is written by a different author, so you get a lot of different viewpoints and writing styles. Definitely recommend to anyone needing to teach a multicultural counseling course or strengthen their own multicultural counseling competencies. 0 of 0 people found the following review helpful. Five Stars By Steven A. Benasher Great price, the book is easy to read and very helpful.

The purpose of this book is to expose students of the helping professions, counselors, teachers, college professors, mental health workers, and social workers to the unique characteristics of representative American subgroups and to effectively assist these same professionals as they work with clients and/or students from these populations. These are grouped by race, gender, sexuality, age, physical limitations and lifestyle etc. The author of each chapter is both a trained helping professional and a member of the group in question. This unique combination of qualifications lends both an academic and a personal perspective to the understanding of the populations represented.

"The chapters in this book cover some groups not often covered in diversity writings. Via personal stories, observations, and rich case examples from their own experience, the authors pull the reader in - and help the reader see from new, instructive, and informative perspectives." - L. DiAnne Borders, PhD, Professor and Chair, Department of Counseling and Educational Development, University of North Carolina at Greensboro "This outstanding text provides the mental health practitioner with a comprehensive exposure to the knowledge and cultural characteristics necessary for success in working with diversity. A careful reading of this book is an excellent base for those who seek to understand and assist members of diverse populations." - Richard M. Canada, EdD, Professor, College of Education, Texas AM University Corpus Christi
