**Steve Ginter : Curtiss SOC Seagull (Naval Fighters)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Curtiss SOC Seagull (Naval Fighters):

0 of 0 people found the following review helpful. Four Stars By Donald D. The usual Ginter quality. Helpful photos and data for modelers. 0 of 0 people found the following review helpful. Another great well put together book By John Another great well put together book. A friend of mine is using the resource of this book to scratch build a 1/24th Scale production of this A/C. 0 of 0 people found the following review helpful. Five Stars By Christian Lacroix Very good book filled with many clear pictures

The Curtiss SOC Seagull was a United States single-engine scout observation biplane aircraft, designed by Alexander Solla of the Curtiss-Wright Corporation for the United States Navy. The aircraft served on battleships and cruisers in a

seaplane configuration, being launched by catapult and recovered from a sea landing. The wings folded back against the fuselage for storage aboard ship. When based ashore or on carriers the single float was replaced by fixed wheeled landing gear.
