**Karl-Heinz Regnat : Dornier Do 335: An Illustrated History (Schiffer Military History S)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Dornier Do 335: An Illustrated History (Schiffer Military History S):

0 of 0 people found the following review helpful. Four StarsBy Roberto Contreras SrA very technical book with abundance of references and original photos, lack of operational information0 of 0 people found the following review helpful. the last Anteatr.By steamnoirHistorically a good read but needs more color illustrations to flesh it out. I liked finding out what the fate of the last one left has been.0 of 0 people found the following review helpful. Five StarsBy MikeC.A rare but exceptional aircraft is described in this excellent book.

This is the first comprehensive, well-illustrated documentation on the Do 335, one of the milestones in German aviation history. The Do 335 was developed by Dornier as a heavy fighter in 1943. One of the last high-performance piston-engined aircraft designed, the Do 335 was powered by tandem fore-aft engines, a concept proven in numerous

Dornier flying boats. As a result of this configuration, drag was reduced to little more than that of a single-engined aircraft, enabling the Do 335 to achieve very high speeds. The Do 335 represented the apex of propeller-driven aircraft in the Second World War.
