William C. Davis : Duel Between First Ironclads (Davis) before purchasing it in order to gage whether or not it would be worth my time, and all praised Duel Between First Ironclads (Davis):

LefcourteI reviewed "The Battle Of The Ironclads" by Quarstein and called it the best book that I'd read on the Monitor and Virginia/Merrimack. That was before reading this book. This book has more source material and, consequently, more detail and is a better text. "The Battle Of The Ironclads" has more contemporary illustrations so both books complement each other in some ways.

Despite the additional source material there are strange omissions in Davis' book, for one he does not mention why the Navy Department disliked Erickson: "The Princeton" affair wherein a gun, not designed by Erickson, blew up killing some high government officials when tested on the Princeton, a ship designed by Erickson, and Erickson was blamed for the deaths. Davis also casually mentions that the Confederacy was working on an ironclad called the Richmond when the Confederates abandoned the Norfolk Boatyard. In fact, work was proceeding on both the Richmond and Virginia simultaneously and it is possible that the Virginia could have been completed earlier with more devastating affect on the Union fleet if all work had concentrated on her. Davis' work is the more scholarly of the two with an index and list of references. Either one is a great read with much detail and the true student of the Battle or of the Civil War will want to read both. 1 of 1 people found the following review helpful. This one is pretty darn good! By Watchmandu reviews Very well researched. Interesting story, that illuminates the character of the men involved as well as the nuts and bolts of the iron clads. The writing is a little stilted. Overall, an informative, enjoyable read. 1 of 1 people found the following review helpful. One of the best By Michael Beck One of the very best books on this subject that I have read in a long time. Started reading and could hardly put it down. I like Davis, he is a good writer on Civil War.

One was called "a tin can on a shingle"; the other, "a half-submerged crocodile." Yet, on a March day in 1862 in Hampton Roads, Virginia, after a five-hour duel, the U.S.S. Monitor and the C.S.S. Virginia (formerly the U.S.S. Merrimack) were to change the course of not only the Civil War but also naval warfare forever. Using letters, diaries, and memoirs of men who lived through the epic battle of the Monitor and the Merrimack and of those who witnessed it from afar, William C. Davis documents and analyzes this famous confrontation of the first two modern warships. The result is a full-scale history that is as exciting as a novel. Besides a thorough discussion of the designs of each ship, Davis portrays some of the men involved in the building and operation of America's first ironclads—John Ericsson, supreme egoist and engineering genius who designed the Monitor; John Brooke, designer of the Virginia; John Worden, the well-loved captain of the Monitor; Captain Franklin Buchanan of the Virginia; and a host of other men on both Union and Confederate sides whose contributions make this history as much a story of men as of ships and war. William C. Davis is the editor of *Civil War Times Illustrated* and the author of *Breckinridge: Statesman, Soldier, Symbol*; *The Battle of New Market*; *Battle at Bull Run*; and *The Orphan Brigade*.
