Ian Black : English Electric/BAC Lightning Manual: 1954 to 1988 (all marks and models) (Owners' Workshop Manual) before purchasing it in order to gage whether or not it would be worth my time, and all praised English Electric/BAC Lightning Manual: 1954 to 1988 (all marks and models) (Owners' Workshop Manual):

Enjoying continuous frontline service with the RAF for nearly 30 years, the supersonic English Electric Lightning jet was the Spitfire of its era and the last of a special breed of fighter aircraft: single-seat, all-British, magnificently overpowered and possessing delightful handling qualities. During its lifetime it became the favourite mount for jet

fighter pilots and thrilled the crowds at countless air displays with its spectacular speed and awesome performance. Former Lightning pilot Ian Black brings a level of level of insight into operating the Lightning that is second to none.

About the Author Ian Black flew the Tornado ADV in the first Gulf War and over Kosovo. He is now an A340 Airbus captain with Virgin Atlantic. An accomplished aviation author and photographer, he lives in Switzerland and the UK.
