James Lachlan MacLeod : Evansville in World War II (Military) before purchasing it in order to gage whether or not it would be worth my time, and all praised Evansville in World War II (Military):

0 of 0 people found the following review helpful. Great info, great deal.By James CTurned out to be a great gift for my father-in-law. And my wife and I really enjoyed learning a little more history of our town. Great info, great deal. - James0 of 0 people found the following review helpful. Interesting and informativeBy Chris S NorringtonFascinating story of Evansville and its contributions to the war effort. Well researched. A must read!0 of 0 people found the

following review helpful. Five StarsBy J. DahlHusband appreciated the book

During World War II, the city of Evansville manufactured vast amounts of armaments that were vital to the Allied victory. The Evansville Ordnance Plant made 96 percent of all .45-caliber ammunition used in the war, while the Republic Aviation Plant produced more than 6,500 P-47 Thunderbolts--almost half of all P-47s built during the war. At its peak, the local shipyard employed upward of eighteen thousand men and women who forged 167 of the iconic Landing Ship Tank vessels. In this captivating and fast-paced account, University of Evansville historian James Lachlan MacLeod reveals the enormous influence these wartime industries had on the social, economic and cultural life of the city.

About the AuthorJames L. MacLeod was educated at the University of Edinburgh in Scotland. He taught history and British studies at Harlaxton College from 1994 to1999 and since 1999 has been a member of the history department at the University of Evansville. He conducts research and teaches courses in European history and the two world wars, and lectures frequently on these topics.
