**Craig H. Allen : Farwell's Rules of the Nautical Road** before purchasing it in order to gage whether or not it would be worth my time, and all praised Farwell's Rules of the Nautical Road:

2 of 2 people found the following review helpful. ONE OF THE FINEST TEXTBOOKS WRITTENBy David H. GambrelWithout a doubt this is one of the finest textbooks written about maritime safety. It has been said that vessel pilots are not lawyers, but this book certainly emphasizes of knowing the rules of the nautical road and obeying them. It certainly should move the conscientious helmsman from the old position of "that's what company lawyers are for" to the more responsible position of knowing the COLREGS or INLAND RULES well enough to avoid tragic mistakes.

Allen's students at the University of Washington should have no trouble staying interested in his class. 0 of 0 people found the following review helpful. It explains everything in pretty great detail. By CustomerAs someone who dabbles in the hundred ton community, and am a BM in the CG, you should buy this if the COLREGS really piss you off. And they piss all of us off. SO buy it. It explains everything in pretty great detail, and gives you a ton of reference material. Its like the BOWDITCH or JANES for Nav rules. 10 of 10 people found the following review helpful. A Professional mariner's reference. By D. GouldFarwell's should be on every professional mariner's bookshelf. This book is the most in depth and thorough presentation on the nautical rules and how they are interpreted that anyone has ever assembled. Filled with references to legal cases and decisions that support the reasons behind each rule, Farwell's is used by admiralty lawyers everyday. The book also traces the history of each rule, and discusses the difference in inland and COLREGS rules. This book would not be recommended to a recreational boater who is looking to just learn the rules for a test. This is a thick, heavy reference that explores every nuance and detail of each rule. It is however, an excellent reference for any professional mariner who ever has command authority on board a vessel.

Professional mariners, military and civilian, will find this book to be an invaluable reference in understanding the rules of the road and the role these rules play in managing the risk of collision. The author provides a thorough commentary on the rules and an analysis of collision cases involving abuse of the rules. Maritime attorneys and judges will find the book continues to be an indispensable reference on collision law as Craig Allen provides a mariner's insight into how the rules apply in context and their application by the courts and administrative tribunals. This new edition completely revises chapters on the rules pertaining to good seamanship and special circumstances and on restricted visibility, and it vastly expands coverage of the narrow channel rule, traffic separation schemes, and the application of the rules to high-speed craft. It also extensively revises materials on the look out and risk of collision responsibilities to update coverage on radar and ARPA and to address new technologies, such as integrated bridge systems, automatic identification systems, voyage data recorders and the increasingly active role of VTS. The first update in ten years, the eighth edition upholds and even surpasses the standards set over the past sixty years of the guide's publication.

About the Author Craig H. Allen is the Judson Falknor Professor of Law at the University of Washington, where he teaches maritime and international law. He is a retired Coast Guard officer and cutterman who formerly held the Charles Stockton Chair in International Law at the U.S. Naval War College and served as a Distinguished Visiting Professor of Maritime Studies at the U.S. Coast Guard Academy and a Visiting Professor at Yale Law School. He is the author of *Farwell's Rules of the Nautical Road* (8th edition, Naval Institute Press 2005) and *Maritime Counterproliferation Operations and the Rule of Law* (Praeger 2007) and serves on the Board of Editors for the *Journal of Navigation and Ocean Development and International Law*.
