**Martin van Creveld : Fighting Power: German and U.S. Army Performance, 1939-1945 (Contributions in Military History)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Fighting Power: German and U.S. Army Performance, 1939-1945 (Contributions in Military History):

0 of 0 people found the following review helpful. You will be better to understand why the military reflects the society it ...By Louis S. MenyhertEssential read if you wish to understand the strengths and weaknesses of these respective militaries. You will be better to understand why the military reflects the society it comes from.0 of 0 people found the following review helpful. Five StarsBy Stephen J. AntonClassic!0 of 0 people found the following review helpful. Great bookBy CustomerGreat book to read for history buffs.

Analyses the performance of two key parties engaged in fighting during World War II.

"Martin van Crevald has produced yet another provocative book that ... is bound to stimulate discussion. ... With the aid of almost sixty tables and figures van Crevald conducts a sophisticated analysis of measurements and calculations, juxtaposing the Wehrmacht to the U.S. Army in order to establish where the secret of the former's superior efficiency lay in scoring more kills than the enemy. ...van Crevald proceeds in a more sober and systematic way to look into a wide range of categories: social status, structure and mobility, army organization and administration, rewards and punishments, and the role of noncommissioned officers and of the officer corps." - American Historical "In this study, Van Creveld analyzes the ways in which the WWII German Army developed the fighting power that allowed them to achieve a number of military victories even when outnumbered and using outdated equipment. He compares and contrasts the Germans with the U.S. Army, which developed a different style of war based on superior economic and technological resources. Coverage includes organizational elements such as principles of command, assignment of manpower, and indoctrination of troops. This is a reprint of a volume originally published in 1982." - Reference Research Book NewsAbout the AuthorMartin van Creveld
