3 of 3 people found the following review helpful. which is fine as an intro. I was expecting something more comprehensive. It's more cliff notes, which is fine as an intro. 0 of 0 people found the following review helpful. Doesn't go into deep enough detail. A very broad look at these generals and their tactics. I was expecting maps and in depth step by step analysis of key battles but none of this was in here. The author would spend a couple sentences or at most a paragraph or two on MAJOR battles. Read Wikipedia articles and you will get better analysis of these generals. Thoroughly let down. No maps!?! Come on! 0 of 0 people found the following review helpful. Interesting. By Kindle Customer. Good facts about battles and personal accomplishments. Good information for military history class. Other generals I would have included. But overall old book.
