Dénes Bernád, György Punka : Hungarian Fighter Colours, Vol. 1: 1930-1945 (White Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Hungarian Fighter Colours, Vol. 1: 1930-1945 (White Series):

1 of 1 people found the following review helpful. I was not at all disappointed, believe me By Feldmar Twomblebee I bought this as a reference for use when modeling other than German militants using German production aircraft. I was not at all disappointed, believe me. I like it so much that I bought the rest of the books in this white series of references. I especially recommend the two Finish fighters books. I also have ordered the book on Finish bombers in

color based on what I have seen so far. 2 of 2 people found the following review helpful. Excellent, in depth work
By Jim Byrne Excellent, in depth work, well written, informative, and illustrated with great color plates. Well worth the investment for anyone interested in WWII Axis aircraft and scale modelers in particular. 2 of 2 people found the following review helpful. Fine book on WWII Hungarian Aircraft
By Dr. Leo Niehorster Dénes Bernard and György Punka "Hungarian Fighter Colors, 1930–1945" Vol. 1 Stratus, Sandomierz, Poland, 2013. ISBN: 978-83-61421-71-9 188 pages; Vol. 1 covers the Fokker D.XVI; FIAT CR.20, CR.20B; AVIS I-IV.; FIAT CR.30, CR.30B; FIAT CR.32, CR.32bis; FIAT CR.42, CR.42CN; Messerschmitt Bf 109D-1; Messerschmitt Bf 109E-3, E-4, E-7; Messerschmitt Bf 109F-2, F-4. The book is FAR more than just being another book dealing with colors and markings of airplanes. Besides the many, many photographs and color profiles, there is a well-written, informative text also covering design, production, and use. And, a real treasure for me — and for those into orders of battle — is the appendix with some 18 pages covering fighter units during this period. That alone makes the book worth its purchase. I certainly recommend this book, and can hardly wait for Volume 2.

This book describes and illustrates all the fighter aircraft used by the Hungarian armed forces during WW2. Covering both the indigenous designs employed early on through to the German and Italian fighters flown for much of the period, the camouflage and markings of these aircraft are described and illustrated in great detail. Fully illustrated with many rare wartime photos. Full color profiles of many representative aircraft. In the volume One are described the following aircraft: Fokker D.XVI FIAT CR.20, CR.20B AVIS I-IV. FIAT CR.30, CR.30B FIAT CR.32, CR.32bis FIAT CR.42, CR.42CN Messerschmitt Bf 109D-1 Messerschmitt Bf 109E-3, E-4, E-7 Messerschmitt Bf 109F-2, F-4

East-Front Axis aircraft enthusiast? Buy, beg or borrow this brilliant book. Then prepare to alter your ideas of Hungarian warplane warpaint... the first authoritative, English-language study of this fascinating topic. The inimitable Dénes Bernád and György Punka methodically mine and milk original sources. And in some cases, they literally excavate actual evidence to craft their amazingly absorbing account... MMP has forged a deservedly brilliant reputation with terrific tomes like this. Get this superb study – now. Then fight for a place in line behind me for Vol. 2! Ravidly recommended. Cybermodeler (Cybermodeler) an outstanding book that is well researched, provides us with a bevy of interesting photos and is just the perfect book for the modeler and enthusiast alike. Highly recommended. (Model Madness) About the Author Denes Bernad has specialised in studying Romanian and Eastern European military aviation during World War 2 for the past 25 years. A mechanical engineer by profession; he is also a founding member of the Association to Promote the History of Rumanian Aviation and Hungarian Association of Aviation History. Gyorgy Punka is an aviation engineer based in Budapest. He has written several books and numerous articles on the Hungarian Air Force during World War 2.
