Oh, and by the way, Nelson demolishes the idea that young Lt. John Kennedy was at fault in any way when his boat got sunk. Quite the contrary - the man was an exemplary boat commander.(P.S. - As of this writing [9/24/2017] .com renders the name of this author

as "Curtix." It's CURTIS. Sheesh.)3 of 3 people found the following review helpful. DisappointingBy BlueMuch, much time devoted to the political ins and out surrounding the US PT boat program inception. Disappointing lack of attention to the pluses and minuses of the two PT types and of their effectiveness in both the SW Pacific and the Philipines. Not a 'Buy' Recommendation in terms of general reading, but perhaps a fair reference for one wanting a place to start in writing a PT Boat Book.0 of 0 people found the following review helpful. Five StarsBy Taylor C.Great book!

Provides a comprehensive critical analysis of a vessel long neglected by naval scholars - Highlights the involvement that FDR, Douglas MacArthur, John F. Kennedy, and others had with the PT Hunters in the Shallows examines the development of the small torpedo boat in U.S. naval history from Lt. William Cushing's heroic Civil War attack on the Confederate ram Albemarle in 1864 in a forerunner of the PT to the type's zenith in World War II. Curtis L. Nelson takes readers inside the scandalous 1939 Elco deal to manufacture PTs, describes Gen. Douglas MacArthur's dramatic escape from Corregidor via PT in 1942, and assesses the sinking of John F. Kennedy's PT-109 off the Solomon Islands in 1943.

"- "Lively, informative history." - World War IIAbout the AuthorCURTIS L. NELSON has written for Naval History magazine and has been a consultant for historical documentaries relating to the PT. He lives in Eden Prairie, Minnesota.
