(Ted) MeyersWhile not a "history" in the sense of the word "Indelible Memories" does a good job of recording accounts of sailors who served in Canadian ships during the Korean War. As one who served from 1950-52 I was able to recall several of the instances - but I also noted a number of errors. Several were quite glaring - incorrect names, places and dates, but these, for the most part, were mainly the result of faulty memories by the narrators. Nonetheless, they could

have been corrected by the author with a bit of research. The inclusion of a Glossary of Naval Terms was a truly good addition which undoubtedly gave non-naval readers a better understanding of what the narrators were saying. There only one typo (of small importance) where a narrator is recorded as serving aboard the wrong ship. An Index would have made this work a very valuable tool for future researchers and it is an unfortunate oversight that one was not included.0 of 0 people found the following review helpful.
