Timothy A. Nelson : Jet City Rewind: Aviation History of Seattle and the Pacific Northwest before purchasing it in order to gage whether or not it would be worth my time, and all praised Jet City Rewind: Aviation History of Seattle and the Pacific Northwest:

From the dawn of human flight to today, Seattle has hosted flying history from dirigibles and fabric biplanes to jumbo jets, from epic pioneering flights to innovative companies making world travel routine. This book recaptures that historical awe and connects it with a sense of place. These subjects may span decades of existence or represent a single day's events. Some are inspiring places of creativity and innovation, some are grim accident sites. All have some significance to the story of flight in the region. Do you know the exact spot of the first airplane flight in the area? How about where The Boeing Company began? Where did the top secret XB-29 prototype crash during its urgent WWII test program? Where did the first non-stop flight across the Pacific end? This book will answer those questions and many more as we dig into the aviation archeology of the "Jet City" and its surroundings.
