She loved Berlin when it was beautifully intact before the war ...By Dakota5280I grew up with stories of WWII from my mother who was born in Berlin/Charlottenburg in 1927. She started school in 1933 when Hitler came to power. She was sent with her classmates to the Carpathian Mountains in 1942 to escape the Allied bombings, then sent to East Prussia with

her classmates to help with the farming, and then was successfully evacuated to Stettin in northern Germany in January 1945 on the overcrowded ship Pretorius, with Russian submarines chasing them across the Baltic. Also in that month, her grandmother, whose family had farmed the land near Pilkallen/Schlossberg/Dobrovolsk for centuries, abruptly abandoned the farm to escape the rampaging, hate-infused Russian army, and she died of exposure to the brutal cold along the road to Königsberg. My mother made her way to a farm west of Berlin to escape the last battle, and then spent the period from May 1945 through November 1947 with her surviving family at the Ronnestrasse apartment building in Berlin where they grew up. It was the only building in the area that had not been destroyed. They cleaned endless piles of brick in exchange for a meal ticket. Later, she and one of her sisters went to work as translators for the British military government, a job that gave them a bit more food and relief from the cold during the day. In 1947, she began a new life in America. My mother became a citizen of the US in 1953, but she remained in her heart a proud Berliner to her last day. She loved Berlin when it was beautifully intact before the war and she loved it when it had been reduced to rubble during the war. She loved it as it toiled its way back and beautifully rebuilt itself. She knew intuitively, through all those years, that her people were good people, and that Americans were not being told the whole truth about the war. Mr. Bradberry, your book explains a great deal about why my mother was justified in her love for her German homeland. I only wish she could have lived long enough to read it. I now have read it for her. Thank you!

By Karim Mansouri This book explains why America, Israel, the European Union, are declining, economically, culturally, and morally. The book also helps us understand why we are constantly in a state of war and why so many people are murdered in these vicious wars all around the globe, why we are constantly taxed, why our youth, and many adults are absurdly ignorant, like sheep following the leader, into oblivion. War, war, war, this books explains it all.

As the title “The Myth of German Villainy” indicates, this book is about the mischaracterization of Germany as history's ultimate “villain.” The “official” story of Western Civilization in the twentieth century casts Germany as the disturber of the peace in Europe, and the cause of both World War I and World War II, though the facts don't bear that out. During both wars, fantastic atrocity stories were invented by Allied propaganda to create hatred of the German people for the purpose of bringing public opinion around to support the wars. The “Holocaust” propaganda which emerged after World War II further solidified this image of Germany as history's ultimate villain. But how true is this “official” story? Was Germany really history's ultimate villain? In this book, the author paints a different picture. He explains that Germany was not the perpetrator of World War I nor World War II, but instead, was the victim of Allied aggression in both wars. The instability wrought by World War I made the 1917 Bolshevik Revolution in Russia possible, which brought world Communism into existence. Hitler and Germany recognized world Communism, with its base in the Soviet Union, as an existential threat to Western, Christian Civilization, and he dedicated himself and Germany to a death struggle against it. Far from being the disturber of European peace, Germany served as a bulwark which prevented Communist revolution from sweeping over Europe. The pity was that the United States and Britain did not see Communist Russia in the same light, ultimately with disastrous consequences for Western Civilization. The author believes that Britain and the United States joined the wrong side in the war.

About the Author Benton L. Bradberry served as an officer and aviator in the U.S. Navy from 1955 to 1977, from near the beginning of the Cold War to near its end. His generation was inundated with anti-German propaganda and “Holocaust” lore. In his role as a naval officer and pilot, he was immersed in anti-Communist propaganda and the war psychosis of the Cold War era. He has had a life-long fascination with the history of this period and has read deeply into all aspects of it. He also saw much of Europe during his Navy years and has travelled widely in Europe since. A natural skeptic, he long ago began to doubt that the “propaganda” told the whole story. He has spent years researching “the other side of the story” and has now written a book about it. The author is a graduate of the Naval Post Graduate School in Monterey, California with a degree in Political Science and International Relations.
