R. G. Burton : The Road to Austerlitz: Napoleon's Campaign of 1805 before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Road to Austerlitz: Napoleon's Campaign of 1805:

How Napoleon marched towards his star In 1805 Napoleon and his Grand Army gathered on the shores of the English Channel ready to launch themselves across its short expanse to begin the invasion of Britain. But the Royal Navy

would continue to 'rule the waves' to ensure that the essential 'twenty four hour dominance of the channel' that the Emperor prayed for would never occur. So it was that he would once again turn his attention for military conquest towards the East. The brilliant campaign that culminated in the victory of Austerlitz is told in this history making it vital reading for all students of the military history of the Napoleonic epoch.
