Stephen Turnbull : The Samurai Invasion of Korea 1592–98 (Campaign) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Samurai Invasion of Korea 1592–98 (Campaign):

Good account of one of the most devastating wars ever seen in KoreaBy Phil HistorianThe two Samurai invasions of Korea from 1592-98 are not as well known as the Korean war of the 1950s. yet this was the worst war for Korea until that conflict. Korea was invaded afterwards by the Chinese, Russians, and Japanese during the 16th to 20th centuries. maybe the reason the 1950s conflict is more famous because veterans of that conflict are still living, and the effects are still felt in the Korean Peninsula? the Japanese also wanted China, Taiwan, India, and the Philippines, all of which they would take over in WW2. the Chinese were also involved in this war and the Korean turtle ships defeated the Japanese on the sea. this is a rare Osprey and a keeper which I recommend be added to any large Osprey collection.0 of 0 people found the following review helpful. Short, but

Kindle version has major problems. By Customer The illustrations are cool BUT the maps. The maps are completely broken on Kindle, both on my actual Kindle device and the kindle apps for OSX and Android. The maps are cut up into 4 or 6 pages and it's impossible to view the whole map at once. Sometimes important details are RIGHT at the X where the map is cut so you have to flip back and forth between 4 pages just to read someones name. Were these maps giant foldouts in the original text or something? Overall, I'm really liking the 9.99\$ Kindle editions of Turnbull's Osprey series. Keep em coming! 9 of 9 people found the following review helpful. Turnbull's 2002 edition was superb, but this volume is disappointing... By JCI enjoyed Turnbull's 2002 edition "Samurai Invasion," but this 2008 version really disappointed me. There is really no new information or insight added from his previous book. But the real disappointment is that it is very dry and boring to read. His elegant and captivating writings from the 2002 classic is missing and the readers are only left with a 90 pager book full of colorful, fancy illustrations. The publisher 'Cassel Co.' is not reprinting his 2002 edition anymore, so perhaps that prompted him to write a new, inferior book.

The invasions of Korea launched by the dictator Toyotomi Hideyoshi (1592-1593 and 1597-1598) are unique in Japanese history for being the only time that the samurai assaulted a foreign country. Hideyoshi planned to invade and conquer China, ruled at the time by the Ming dynasty, and when the Korean court refused to allow his troops to cross their country, Korea became the first step in this ambitious plan of conquest. In 1592 a huge invasion force of 150,000 men landed at the ports of Busan and Tadaejin under the commanders Konishi Yukinaga and Kato Kiyomasa. These two Japanese divisions rapidly overran their Korean counterparts, taking the principal cities of Seoul and then Pyongyang and driving the remnants of the Korean Army into China. The Japanese division under Kato Kiyomasa even started to advance into Manchuria. However, the Korean strength was in their navy and the vital Korean naval victory of Hansando disrupted the flow of supplies to the invasion forces, forcing them to hold their positions around Pyongyang. In 1593, the Chinese invaded capturing Pyongyang from the Japanese and driving them southwards. This phase of the war ended in a truce, with the Japanese forces withdrawing into enclaves around the southern port of Busan while the Ming armies largely withdrew to China. In 1597, following the breakdown in negotiations, the Japanese invaded again with a force of 140,000 men. However, the Chinese and Koreans were now better prepared and the advance came to a halt south of Seoul, and then forced the Japanese southwards. In November 1598 Hideyoshi died, and with him the enthusiasm for the military adventure. The Japanese council of regents ordered the withdrawal of the remaining forces, and the naval battle of Noryang, which saw the Japanese fleet annihilated by the Korean admiral Yi-Sunshin, proved to be the last significant act of the conflict.
