Published in association with Imperial War Museums, The Story of the Second World War for Children sensitively explores history's deadliest conflict. Packed with photographs, maps, and detailed cross-sections of famous tanks, aircraft, submarines, and warships, it outlines key battles and shows how the war affected people across the world—not just the soldiers fighting on land, at sea, and in the air, but also the children evacuated to the countryside, bombed-out city dwellers, and civilians working in munitions factories.
